

Local Government Operations Protocol – Comments
City of Morgan Hill

1. The protocol and inventory report is complicated. Many cities are having issues with trying to use ICLEI's software. It seems like the protocol would require more consultant work. Extensive training to individuals in local government should be provided upon finalizing the protocol.

2. Since many cities have signed up with ICLEI to use their software, it would be efficient to incorporate the protocol into their existing CACP software and generate reports.
